

B₁
application is related to U.S. Serial No. 09/223,773, "A System for Converting Event-Driven Code into Serially Executed Code", filed on December 31, 1998; to U.S. Serial No. 09/223,558, entitled "Transporting Objects Between A Client and A Server", filed on December 31, 1998; and, to U.S. Serial No. 09/223,565, entitled "Drag and Drop Creation and Editing of A Page Incorporating Scripts", filed on December 31, 1998. --

In the Claims:

- B₂ sub C17
1. (Amended) A computer-readable medium having stored thereon a data structure, comprising:
 - a page object control on a first page for storing a list of at least one of a method and a property associated with said first page,
 - wherein a second page is capable of instantiating said page object control and implementing said at least one of a method and a property associated with said first page into said second page.
 2. (Amended) The computer-readable medium according to claim 1, wherein at least one of said method and said property includes values settable by a developer.
 3. (Amended) A computer-implemented method for creating a first page capable of referencing a second page comprising the steps of:
 - editing said first page;
 - referencing said second page from said first page;

B2
referencing at least one of a method or property from said first page, said at least one of a method or property being associated with said second page;
storing said first page.

Please add new claims 8-11:

B3
-- 8. (New) A system for allowing manipulation of pages as objects for exchange between a client and server comprising:

a first page object control on a first page;

a second page object control on a second page, said second page object control storing a list, said list comprising at least one of a method and a property associated with said second page;

at least one method on said second page;

wherein said first page retrieves said second page object control and is capable of incorporating at least one method or property from said list to support script in said first page.

9. (New) The system of claim 8 wherein the at least one of a method and a property associated with said first page comprise values settable by a developer.

10. (New) The system of claim 9 wherein the first page is on a client.

11. (New) The system of claim 9 wherein the first page is on a server.--
